

SYSTEM ATTRIBUTES:

- Theft deterrent system slows down mass package “sweeping”.
- Option for non-powered audible alert tone (bell or ratcheting feature) that notifies associates nearby that a shelf has been accessed.
- Adjustable window that can be set to various heights in between shelves.
- Molded in a resilient and durable polycarbonate plastic.
- Steel hinge mechanism has been calibrated and tested for thousands of rotations.
- Adjustable steel side panels prevent side access to product on shelves.
- System is adaptable to all types of merchandise in stores.
- Bolts directly to existing underside of shelf using security screws
- Does not interfere with shelves that have pre-existing spring pusher systems in place.
- User friendly; Quick and easy to install!
